DETAILED ACTION

1. Prosecution of the instant application is hereby reopened.
2. Applicant's amendment canceling claims 6-11 has been entered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 12-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Since claims 12-14 totally encompass the material claimed in canceled claims 6-11, which were held unpatentable by the Board of Appeals and Interferences and claims 15-17 overlap 98% of the material claimed in canceled claims 6-11, which were held unpatentable by the Board of Appeals and Interferences, the examiner holds that the claims 12-17 are based on a disclosure which is not enabling. There is no antecedent basis for the "average particle size of no more than 320.1 nm" or the "average particle size of no more than 196.3 nm" or the "surfactant content of no more than 2%" in the specification. Claims 12-17 are not original claims. This rejection is completely consistent with the decision of the Board of Appeals and Interferences handed down 3/2/04.
